【What is HDMI?】

- ◆ HDMI is the abbreviation of High Definition Multimedia Interface.
- ◆ The HDMI Founders include consumer electronics manufacturers Hitachi, Matsushita Electric Industrial (Panasonic/National/Quasar), Philips, Sony, Thomson (RCA), Toshiba, and Silicon Image.
- ◆ Under the single digital interface, it integrates high resolution video and double-path audio with highest speed up to 2.5G bps.
- ◆ It supports un-compressed high-end digital signal that is much easier to be used in small adapter. Also, its fewer conductors also support the full-duplex devices without distortion.

S284012086

FEATURES

Cable: Three layers of shielding : two 80% OFC copper braids and one 100% overlapped Mylar foil OD: 7.3mm.

Connectors: gold-plated

Jacket: PVC in Black

Length: 1.5M , 3M, 5M....or as requirement

Material: ROHS Compliance available

HIGH DEFINITION MULTIMEDIA INTERFACE

The HDMI can carry out big volume of digital data and is usually used for digital image/voice communication. Under DVI (Digital Visual Interface) formulation, HDMI is suitable to use on Digital TV, DVD player, STB and other digital image/voice product. When HDMI is keeping in high quality, it can beam uncompressed high-resolution image/double sound track information via digital style. The highest speed can reach to 5Gbps.

The advantage of HDMI is like uncompressed high digital quality, using fewer cables, small connector and gentle interface. Also, it can be in accordance with the standard of DVI. Besides, HDMI has other merit like 1) adapting group-into tech. of data-transmission to integrate image and voice that can use on 15mm consume style electric equipment and 19 pin HDMI interface 2) combined HDCP.

We would like to suggest strongly to turn on the monitor first and then the power. That will help HDMI to perform digital image by its high-resolution (above 720 P). Otherwise, HDMI will perform the digital image by its low-resolution (eg. 480 P).

002876_0000A

DISPLAY PORT MALE TO
DVI F

If you're a home or office PC user, a gamer, a content producer – or someone who simply believes in a better way – then you should be excited about DisplayPort. DisplayPort delivers on the promise of digital displays. It replaces the clunky DVI interface and eventually replaces the analog VGA interface on displays and PCs with an innovative digital solution that supports the latest graphics and LCD technologies. DisplayPort assures that you get the best experience from your LCD. It simplifies display design and connections, enables interoperability with existing display interfaces and provides a technology foundation to deliver new and exciting display capabilities.

Item	HDMI/DVI Converter
Displayport source input port	1
Video device output Port	1
Displayport source port	DisplayPort 20pin
Video device Port Connector	HDMI 19 pin / DVI 24 pin
Like LED	1
Video Band Width(bps)	2.7G single link
Single Link Range	1080P/UXGA
Vertical Frequency Range	60Hz
Operation Temperature	0~50°C

Apple

- 1) To design this Mini DVI cable is because of MINI DVI 32PIN applicability with Apple NB, which has a good sales on current market.
- 2) Besides, we have other new development for MINI DVI to VGA / HDMI / DVI and Splitter Cable.
- 3) To use this cable, it can help transmitting picture to HDMI or VGA or DVI interface (monitor) without limited on NB only.
- 4) High quality audio-video enjoyable

NEW

1. One pair as a full functional module, no need of setting.
2. Use UTP CAT-5E/6 cable to substitute HDMI cable to achieve long distance transmission.
3. Follow the standard of IEEE-568B.
4. Transmission distance reaches up to 30 meters under the video format of 1080P.
5. Auto-adjustment of feedback, equalization and amplify, the user does not need to care about the length of the cable.
6. Compact size.
7. Signaling rates up to 2.25Gbits in support of 1080P display.
8. Each port supports HDMI or DVI inputs.
9. HDCP compliant.
10. No power is needed.
11. No extra HDMI cables are needed.

INTRODUCTION OF PACKAGES

Introduction of packages

A01-001

Suitable for HDMI, Display port 2M cable (including PVC Box, cardboard)

A02-001

Suitable for small PVC box + PVC cardboard + label

B01-001

Suitable for AV cable, RCA cable less than 5M length (including label, blister packing, cardboard)

B01-002

Suitable for retractable cables (including label, blister packing, cardboard)

B01-003

Suitable for adapters (including blister packing, cardboard, label)

B01-004

Suitable for VGA, DVI, RJ45, 1394, printer cables, USB cables

C01-001

Suitable for cabin multi adapter (including blister packing and cardboard)

E01-001

Suitable for earphones and microphones

E01-003

Suitable for earphones and microphones

F01-001

Suitable for coil cable

SIZE: 190*80*34mm

SIZE: 190*80*34mm
